## PROJECTS

### MUSIC EVENT SEARCH

<https://github.com/lnewmanheggie/musicEventFinder>

- Worked in a group to create a web application for finding music events.
- Utilized APIs from ticketmaster and bandsintown to search based on artist and city, and used a geolocation API to find events based on user location.
- Users have the ability to narrow search by searching for more than one criteria
- Users can save events in local storage
