PROJECTS

MUSIC EVENT FINDER | **https://github.com/lnewmanheggie/musicEventFinder**
https://lnewmanheggie.github.io/musicEventFinder

- Worked in a group to create a web application that allows users to find music events based on search artist name, city, or venue.
- Was responsible for integrating APIs from Ticketmaster and Bandsintown to search based on artist, city, and venue. Also helped set up the save event feature.

CRIME TRACKER | https://infinite-savannah-89804.herokuapp.com/
https://github.com/mesgt/charmeleon

- Full-stack web application that allows users to view crime data for different states and the city of Denver, as well as enter their own crime data.
- Was responsible for using data and API calls to render data on a map with the Google map API. Data included APIs from the FBI and U.S. census, as well as data from a csv file accessed through mySQL database. Integrated Google map with geoJSON data to create clickable outlines of states.
